(/)

You have a captain's log due before 2023-02-26 (in 1 day)! Log it now!
(/captain_logs/2162316/edit)

Server

Servers are located in datacenters which are buildings that host hundreds, or even thousands of computers (servers). You can think of a server as a computer without a keyboard, mouse, or screen, that is accessible only by a network. A server can be physical or virtual. A server runs an OS (operating system).

Read:

- What is a server (/rltoken/xagkD1OqEgfChHskYyJpyg)

Watch:

- What is a server (/rltoken/miEIK3vwQRPRIPiPyBXn3A)
- Where are servers hosted (data centers) (/rltoken/0fhBw0Of-VIQpUytXZGyGQ)

Do not mix up **server** and **web server**. (Check out the **web server** concept page to know more about this.)
